SPECIFICATIONS

PART 2 - PRODUCTS

2.01 MANUFACTURER

- A. Next Dimension Classic Series Vinyl Direct Set window units as manufactured by Windsor Windows & Doors.

2.02 MATERIALS

- A. Frame: All frames are manufactured using high performance *uPVC* extrusion material. Two frame options are available: A standard frame which is 3 1/4" wide, or a brickmould frame which is 4" wide. The brickmould frame includes a built-in J-channel. Each frame corner is fusion welded, increasing strength and maximizing weather-proof performance. An extruded rigid pre-punched nail fin surrounds the perimeter of the frame and is fusion welded during the manufacturing process. The nail fin is set back 1 1/4" from the outside face of the unit leaving an interior jamb width of 2 3/16" (Single Hung) or 2 3/4" (Double Hung). Factory or field applied jamb extension kit widths are available to 7 1/4". An accessory groove surrounds the perimeter of the interior and exterior to facilitate the attachment of mull strips or drywall and jamb extension receivers. Each frame contains a positive pressure drainage system to remove any moisture that may accumulate from heavy rain or condensation.
- B. Sash: This unit is direct glazed and has no sash.
- C. Finish: White exterior with white interior or clay exterior with clay interior. Color is encapsulated within 100% of all extrusions and is warranted for life not to blister, pit, corrode, flake, or peel.
- D. Glazing: All units include 3/4" double pane LoE 366 insulated glass as standard. Glass is set with snap-in glazing beads and adhesive tape. A wide array of other glass combinations is offered including clear, tinted, tempered, and obscure.
- E. Hardware: Fixed units contain no hardware.
- F. Screens: Fixed units contain no screens.
- G. Grilles: Rectangular aluminum inner grilles, available as 3/4" profiled, are color matched to the unit and are installed within the air space. Windsorlite (WDL) simulates true divided lite, but is created by adhesively fixing the interior and exterior bars to the surfaces of the insulated glass. WDL bar shape is a 7/8" Putty profile, and is available with or without interior bar.
- H. Mulls: Each multiple wide unit includes factory applied vertical mulls and drip cap. Depending on the size, configuration, and structural requirements, mull units may include aluminum structural reinforcement bars.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Verify that there is no visible damage to the unit before installation.

3.02 INSTALLATION

- A. Verify the rough opening is of the recommended size and that it is plumb, level, and square.
- B. Install the window unit in accordance with the manufacturer's recommendations.
- C. Install sealants, backing material, and insulation around opening perimeter in accordance with Section 07900 and Section 07920.

3.03 ADJUSTMENT AND CLEANING

- A. Cover the window unit to avoid damage due to spray paint, plaster, and other construction operations.
- B. Remove all visible labels and instructions.
- C. Final cleaning of glass in accordance of Section 01710.
